Manufacturing Extension Partnership of Louisiana

The Manufacturing Extension Partnership of Louisiana (MEPOL) is a sponsored program of the Louisiana Community and Technical College System (LCTCS) serving Louisiana manufacturers statewide.

We have experts in house, as well as a statewide network of manufacturing extension agents and partners, to provide a full range of services that focus on productivity, profitability and manufacturing success.

Our Mission: To provide Louisiana manufacturers with value-driven, best-practice solutions.

The experts at MEPOL provide targeted needs assessment, consulting and technical assistance to strengthen and enhance your manufacturing business. We collaborate with public and private resources to provide smart, innovative and sustainable solutions that allow our clients to work and compete smarter.

Most importantly, MEPOL is rated, graded and funded on impact; we are committed to a high return on investment.

ECONOMIC IMPACT

MEP Center impacts are based on clients surveyed in FY2016

$1.6 Million
Total Increased/Retained Sales

65
Total Increased/Retained Jobs

$641K
New Client Investments

$326K
Cost Savings
Hardware Resources has continued our implementation of the Lean Principles and initiatives we identified with MEPOL. We are undertaking a complete reorganization of plant operations to synchronize manufacturing processes for each specific product as recommended by the MEPOL team." Randy Grace, Plant Operation Manager

COOPERATING ACROSS STATE LINES

ABOUT. Hardware Resources opened their doors in 1989 to design, engineer and manufacture products for the kitchen cabinet, bath and closet industries. The company offers 24,000 products in 13 product groups within three distinct brands: Jeffrey Alexander, Elements and the Hardware Resources product line. Hardware Resources ships stocked products within 24 hours to customers across the United States and Canada from seven warehouses across the country. One of those warehouses is in Bossier City, Louisiana, with 130 employees.

THE CHALLENGE. Hardware Resources was in need of Lean training, specifically in performing Kaizen events. When the company contacted Arkansas Manufacturing Solutions (Arkansas MEP) for assistance, independent consultant Bob Terhune referred Hardware Resources to the Manufacturing Extension Partnership of Louisiana (MEPOL), another NIST MEP affiliate.

MEP’S ROLE. MEPOL Project Director Rebecca Scherff contracted third-party consulting firm Agile Performance, LLC., to conduct a Lean Initiative Training for Hardware Resources. The training, which took place in Shreveport, Louisiana, consisted of a three-day Lean/General Consulting workshop and a five-day Kaizen Blitz Event. Agile Performance conducted a Lean Assessment of the Shreveport facility and reviewed findings from the training in a follow-up meeting. The Lean Initiative provided time for MEPOL personnel to train, mentor, coach, and support personnel in initiating, learning, implementing and sustaining Lean and continuous improvement activities. Hardware Resources completed a five-day Kaizen Event as an improvement project based on the findings from the Lean Assessment and training events.

By investing in Lean, Hardware Resources has generated over one million dollars in savings and is adding and retaining jobs. In just one year, "Door Manufacturing (area of focus) has improved by 4 percent" over the previous year, according to Plant Operation Manager Randy Grace. "We have developed written standard work instructions throughout the operations," Grace said, "developing training and audit procedures for process control and continuous improvement opportunities."

RESULTS

Cost savings of $1,551,000

24 new/retained jobs

New investment of $55,000
