MANUFACTURING-WORKS

For more than 20 years Manufacturing-Works has been delivering training, experience, and solutions for creating value. With our partners we’re here to help Wyoming businesses to grow to their full potential. We provide broad technical assistance, engineering solutions, general business assistance, marketing assistance, and financial counseling. We are committed to helping businesses by delivering solutions for creating wealth and, in conjunction with others, we can deliver complete solutions for companies. Manufacturing-Works is a not-for-profit organization with professionals positioned throughout Wyoming, with current offices located in Laramie, Casper, Cheyenne, Sheridan, and Afton. Manufacturing-Works’ mission is to assist Wyoming manufacturers, producers and entrepreneurs, in growing their revenues, increasing their productivity and performance, and strengthening their global competitiveness. We are Wyoming’s most trusted resource for manufacturers.

The MEP National Network™ is a unique public-private partnership that delivers comprehensive, proven solutions to U.S. manufacturers, fueling growth and advancing U.S. manufacturing.
QUALITY MANAGEMENT IMPROVEMENT LEADS TO NEW BUSINESS

ABOUT ALLEN INSPECTION SERVICES, INC. Allen Inspection Services, located in Mills, Wyoming, is a family-owned metal service center with 16 employees. This fully mobile company provides metal tubular services and sales including hardbanding, hardband removal, straightening, and tubular inspection, as well as tubular sales and rentals. Allen Inspection’s primary market is the oil and gas drilling industry and it has the only portable hardband removal unit in the Rockies.

THE CHALLENGE. In early 2016, Allen Inspection was audited by a client. At the time, its quality manual was a mere three pages and the company had little to no documentation for much of its operations. The results of the audit were a number of non-conformities that needed corrective action or Allen Inspection stood the chance of losing the work.

The owners of Allen Inspection, Linda and Scott Allen, contacted Manufacturing-Works, part of the MEP National Network, for help. The company needed to address non-conformities, create a better quality manual, and improve the overall business. At the time, Allen Inspection consisted of six employees with three major customers and it did not have the time, knowledge, or experience to correct the situation without outside assistance.

MEP CENTER'S ROLE. Manufacturing-Works started by addressing the non-conformities and helping Allen Inspection with the appropriate corrective actions. After the immediate needs were addressed, Manufacturing-Works rolled out a SharePoint tool for document retention called "The Q" and arranged for ISO 9001:2015 Internal Auditor and Leadership training for the company. Manufacturing-Works supported the Allen Inspection team as it developed a full and robust quality manual in order to become ISO 9001 compliant.

With its new quality management system (QMS) in place, Allen Inspection has been able to quote projects for clients that were previously out of reach. The use of “The Q” and documented procedures has driven internal efficiencies for Allen Inspection, which has improved and streamlined much of its day-to-day work.

"Working with Manufacturing-Works helped us solve a huge problem that appeared to be insurmountable for us. We had no idea how to go from a company with no quality manual or quality culture to one that would stand up to an audit. The ability of Manufacturing-Works to help us break it down into manageable pieces made this achievable for us. If it was not for the team at Manufacturing-Works we would either be out of business today, or still struggling with our documentation and dreading audits."

-Linda Allen, Co-owner

RESULTS

- 10 new jobs
- Increased/retained $4.4 million in sales
- Cost savings of $350,000
- A culture of quality
- QMS has allowed access to new clients
