

## AS9100 AND ISO9001 CERTIFICATIONS

**ABOUT GEM CITY METAL TECHNOLOGIES.** Gem City Metal Technologies, a subsidiary of Dynamic Aerospace and Defense, is recognized as a leader in close tolerance hand spinning. Located in Dayton, Ohio, they are a premier metal forming company. Gem City Metal Technologies has expanded their capabilities to include automatic and CNC metal spinning, laser cutting, high pressure hydroforming, metal stamping and punching. Their in-house design and build capabilities for tool & die, allow them to reduce lead times and alter tooling as required for exceptional service and just in time shipments.

**THE CHALLENGE.** Aerospace is a large portion of Gem City Metal Technologies' business. In order to continue to compete in their market, they needed to become AS9100 certified. Without the required certification, they faced losing a significant amount of business.

**MEP CENTER'S ROLE.** FASTLANE assisted Gem City Metal Technologies to obtain their AS9100 (and ISO9001) certification by supporting their certification audit. This audit is critical and required to become AS9100 certified.

"I would like to thank the team for all of the hard work they do for our company."

-Dave Ironside, Director of Quality

## RESULTS

**\$11,000,000** in increased or retained sales

**50** increased or retained jobs
