

FREUDENBERG SEALING TECHNOLOGIES RETAINS JOBS AND SALES FOLLOWING GAP ANALYSIS FOR ISO 9001:2015

ABOUT FREUDENBERG SEALING TECHNOLOGIES. Freudenberg Sealing Technologies, located in Bamberg, South Carolina, is the world's market and technology leader in sealing technology. Their seals, featured in many well-known end products all over the world, make life that little bit easier. The company serves various market segments including the automotive industry, civil aviation, mechanical engineering, shipbuilding, food and pharmaceuticals, and agricultural and construction machinery.

THE CHALLENGE. The company is registered to ISO 9001:2015 and was looking for a gap analysis to prepare for their surveillance audit.

MEP CENTER'S ROLE. SCMEP, part of the MEP National Network™, was able to provide an expert resource to perform a two-day review of the quality management system. The gap analysis provided a detailed description of non-compliant sections and/or missing sections required for continued registration to the ISO 9001:2015 Quality Management System. A path forward was presented.

"Everyone at SCMEP does a fantastic job and has been a vital asset to our company."

-Ed Swogger, Operations Manager

RESULTS

50 jobs retained

\$8,000,000 in retained sales
