

EPA & DRNA COMPLIANCE: 2021 ANNUAL REPORT FOR EQUIPMENT OPERATIONS, FUEL CONSUMPTION, AND SULFUR CONTENT.

ABOUT PRINT 1 L.L.C. In 2015, Print1 L.L.C initiated operations in Las Piedras, Puerto Rico, for commercial printing and book publishing. Print1 L.L.C serves a variety of clients and sectors such as local and US retailers, supermarket chains, food service companies, marketing agencies, news media, insurance companies and transportation services among others.

THE CHALLENGE. On February 2022 Print1 L.L.C contacted PRiMEX, part of the MEP National Network™, to request support services and training to prepare and submit local and federal reports associated with equipment, fuel, consumption and sulfur.

MEP CENTER'S ROLE. Print1 L.L.C requested support services to complete the EPA annual report and meet the compliance requirements of environmental regulations and avoid penalties. Print1 L.L.C needs to comply with the company's operating permit requirement (PFE-LC-RH44-1118-0828-I-II-O). Since the company had participated in various environmental compliance evaluations sponsored by PRiMEX, top management contacted PRiMEX for assistance evaluating and working 2021 annual report to continue operating and comply with federal and local environmental regulations. On PRIMEX's visit, the work plan was discussed to continue with the preparation of the annual report and annexes. The annual report includes data, information, and evidence. At the meeting, the new annual report was reviewed and passed and delivered in a digital file. The profile and operating elements of Print1 L.L.C. were completed on the DNER/JCA website with the client documents.

"The experience in this project was excellent. We were able to meet all local and federal compliance requirements on time and with everything required by applicable laws and regulations. Very happy for the assigned facilitator, he was very professional and knowledgeable matter. The services were performed as proposed and the training received during the services were excellent."

-Grace Paoli, Environmental, Health, Safety & Compliance Coordinator

RESULTS

115 jobs created or retained

Saved cost of non-compliance, fines range from \$10,000-\$1,000,000

Met compliance deadline

Compliance with local and federal laws and regulations

Twenty-four (24) hours of training on compliance issues, investigation, and analysis processes
