

APEXMG I IMPLEMENTS AS9100 CERTIFIED QUALITY MANAGEMENT SYSTEM AND COMPLIES WITH CMMC STANDARDS

ABOUT APEX MANUFACTURING GROUP, INC. Apex Manufacturing Group, Inc. (ApexMGI) located in Newark, DE, is a small manufacturer offering industry-leading, vertically integrated manufacturing and engineering services through research, design, and the effective implementation of the latest technology, manufacturing, engineering, and business practices. They aim to provide their customers and community with an unparalleled experience through service, quality, and education.

THE CHALLENGE. ApexMGI customers have high expectations, and to secure contracts that would help grow the business, ApexMGI realized that obtaining certain key certifications was necessary to achieve the growth they wanted.

MEP CENTER'S ROLE. The Delaware Manufacturing Extension Partnership (DEMEP), part of the MEP National Network™, worked with ApexMGI to identify the best course of action, which included establishing an AS9100-compliant Quality Management System (QMS) and achieving CMMC compliance. DEMEP provided training and support for implementing an AS9100 QMS and helped develop and document all required policies and procedures. Additionally, DEMEP offered training and assistance to help ApexMGI understand and meet CMMC requirements.

"It is difficult to find resources that understand the unique struggles manufacturers face. DEMEP offers the critical resources and support that manufacturers require."

-John Kuklinski, CEO

RESULTS
