

## MAUMEE PATTERN PARTNERS WITH CIFT FOR COMPREHENSIVE CYBERSECURITY ASSESSMENT AND TRAINING AMID RISING DIGITAL THREATS

**ABOUT MAUMEE PATTERN COMPANY.** Maumee Pattern, located in Toledo, Ohio, specializes in the design and manufacturing of high-quality foundry patterns and molds that are essential for creating metal castings. This 110-year-old family-owned company serves a wide range of industries, customizing designs to meet even the most complex casting requirements.

**THE CHALLENGE.** Considering the current landscape of cybersecurity threats and attacks, Maumee Pattern was eager to safeguard their digital environment, recognizing gaps and the necessity for compliance. Company representatives asked about their options while exploring other opportunities through CIFT and decided to proceed with a comprehensive cybersecurity assessment and training.

**MEP CENTER'S ROLE.** Providing assistance on this project was Techsolve, an Ohio MEP partner. Techsolve conducted a comprehensive cybersecurity gap assessment, including reviewing current company policies, response plans, storage and encryption, and disaster recovery strategies. Next, they collaborated with Maumee Pattern to implement action steps, including an Incident Response Plan, roles and responsibilities, and provided training to key employees. Finally, they conducted a simulation of a cybersecurity attack and recovery efforts.

"The support we received through this program made it possible for us to take the next step toward CMMC compliance. The guidance and funding helped us strengthen our systems and protect the data our customers trust us with."

-Ryan Betz, CIO

## RESULTS

1 increased/retained jobs

Cybersecurity assessment completed, remediated and training implemented
